Interstate Electrical Services Corp. installs dynamic lighting display at 103 CityPoint - owned by BXP

May 03, 2024 - Owners Developers & Managers

Waltham, MA Interstate Electrical Services Corp., one of the largest privately held electrical services companies serving greater New England, participated in a unique and eye-catching project on a prominent building owned by BXP. Interstate was selected to help bring the building owner's vision to life leading to the unveiling of a dynamic lighting display at 103 CityPoint (103 4th Ave.). The lighting installation showcases Interstate's expertise in complex electrical systems and its commitment to pushing the boundaries of lighting design.

The project began with the building owner's desire to create a dramatic and captivating lighting display on the building's facade. The challenging design required Interstate to collaborate closely with designers, builders, and manufacturers to ensure the desired effect.

“This project, stemming from the incredible vision of our client, was a true collaboration between the owner, our team and the architect,” said Eric Crouch, assistant project manager at Interstate Electrical Services. “We faced some initial challenges with color consistency, but through open communication and a commitment to excellence, we were able to deliver a stunning result. PORT Lighting was especially pivotal in getting the dynamic controls across the finish line.”

The final installation features over 700 feet of color-changing LED lights, meticulously positioned to transform the building’s façade into a dynamic canvas. The system allows for an array of pre-programmed shows, enabling the building to celebrate holidays, support local organizations, or simply showcase a vibrant display of colors.

Interstate Electrical Services has a proven track record of success in complex electrical projects, including lighting installations. The company is committed to exceeding customer expectations and delivering high-quality work on time and within budget.

Founded in 1966, Interstate has more than 800 employees, eight offices across New England, and a fleet exceeding 250 vehicles. The company’s 100,000-s/f UL Certified Operations Center houses the largest electrical prefabrication facility in New England, allowing Interstate to provide a remarkable array of electrical services for commercial customers. For over 58 years, Interstate has been committed to exceeding expectations on every project for every customer.
