Studio G Architects selected to lead Meadowbrook Waldorf School project

February 21, 2025 - Construction Design & Engineering

Richmond, RI Studio G Architects, was selected as the architect for Meadowbrook Waldorf School. Studio G Architects emerged as the ideal candidate to lead this transformative project. Meadowbrook Waldorf School serves children from nursery age through grade 8. The children learn and play outdoors every day on the 28-acre campus of woodlands, streams, and meadows.

The school engaged Studio G for the design of a Community Center building. The Community Center will be integrated into the surrounding natural environment while enhancing the school's focus on providing a social education and supporting each child's relationship with, and stewardship of, the earth. The new Community Center will be energy-efficient, sustainable, and resilient. Studio G's design will emphasize a developmentally appropriate and experiential approach, ensuring that every aspect of the environment supports the holistic growth of students. A strong focus on arts, music, and eurythmy will be integrated into the spaces, promoting creative expression and rhythmical movement. Additionally, biophilic design principles will strengthen the students' connection to nature, fostering a sense of tranquility and well-being. Hands-on experiential learning will be at the core of the design, creating spaces that encourage exploration, discovery, and meaningful engagement with the world around them.

"Studio G is extremely excited to partner with Meadowbrook Waldorf School to create a beautiful and inviting space for all children to enjoy for years to come," said Gail Sullivan, managing principal at Studio G Architects. "Meadowbrook Waldorf's emphasis on creating meaningful learning experiences, engaging children in nature while inspiring wonder, curiosity, critical thinking, and confidence aligns with Studio G's mission to support holistic growth of students through Universal Design for Learning principles."

Studio G Architects prioritizes sustainability and healthy building practices in every project. Their expertise in energy conservation, high-performance building systems, and healthy material selection will contribute to creating a learning environment that supports the well-being of students and staff while minimizing environmental impact.

Established in 1991, Studio G Architects was founded to build sustainable communities through architecture, urban design, and planning. A certified women-owned business (WBE), we are renowned for our commitment to sustainability and community enhancement, crafting environments that support each client's unique culture and mission.
