Harriman Association designs 45,000 s/f Fryeburg Academy athletic facility

September 07, 2007 - Northern New England

Construction is complete on the new athletic facility at Fryeburg Academy designed by Harriman Associates Architects and Engineers.

After fire destroyed the 50-year-old Gibson Gymnasium, an original Harriman Associates' building, the firm was commissioned to design a new 45,000 s/f athletic facility that triples the size of the original.

The field house is the centerpiece of the design and includes a running track, three full-size basketball courts, a multipurpose court for tennis, volleyball, wrestling, as well as seating for 800 people. The first floor includes new men's and women's locker rooms, a training room, athletic storage, and administrative offices and meeting space. The second floor houses a practice wrestling room and a fully equipped fitness center.
