Consigli completes EP lab renovations at Baystate Medical Ctr.

February 18, 2009 - Construction Design & Engineering

Consigli Construction Co., Inc. has recently completed renovations to Baystate Medical Center's existing EP lab, installing upgraded finishes and equipment in a busy occupied environment.

The project consisted of upgrading mechanical, electrical and plumbing systems and installing new Siemens monitoring equipment, as well as new lighting fixtures and finishes. Close coordination among the project team and hospital staff helped ensure seamless integration of the new equipment to existing utilities. Additionally, the team maintained high standards for disease control, wearing full scrub suits and medical booties in the corridors adjacent to the active EP-2 lab and conducting all shutdowns in close coordination with hospital staff.

Consigli's craftsmen handled multiple components of the project, including demolition, drywall, installation of doors/frames/hardware and installation of millwork.

The team operated on an aggressive schedule, working after-hours and on weekends due to the occupied nature of the hospital and surrounding spaces.

About Consigli

Consigli, established in 1905, is a construction manager and general contractor serving academic, corporate, healthcare, and institutional clients throughout New England and New York State. The company, an industry leader in environmentally sound building practices, was recently recognized by the Boston Business Journal as one of the Best Places to Work in Massachusetts and in Maine by Best Companies Group.
