ENPRO Services celebrates its 25 year anniversary; expands to ME, VT and NH

April 15, 2009 - Construction Design & Engineering

ENPRO Services, Inc., (ENPRO) recently completed its 25th anniversary, celebrating two-and-a-half decades of business development that has witnessed the Massachusetts-based firm expand throughout New England with a workforce of 100 people.

"We're very proud to have completed 25 years of managing and performing a broad range of environmental services, and we're looking forward to servicing our clients during the next 25 years and beyond," said David Cowie, chief operating officer of ENPRO. "In the past five years alone, we have completed 2,500 response actions, including 1,500-plus emergency responses throughout the Greater Northeast."

Since its inception in March 1983, ENPRO has been providing clients with cost-effective solutions to a wide spectrum of environmental concerns. Throughout New England and New York, ENPRO provides clients with a wide range of comprehensive environmental services including 24-hour oil and hazardous material spill response, turnkey soil and groundwater remediation, facility decontamination, oil and hazardous material transportation and disposal, technical assessments, and specialty construction services tailored to petro/chemical storage tanks and distribution systems. In addition to a wide variety of private sector clients in the insurance, consulting, transportation and property management fields, ENPRO provides environmental services to a number of prominent public sector clients, including the states of Massachusetts, Connecticut, Maine, Vermont and New Hampshire, and the United States Navy, Air Force, Coast Guard, Army Corps of Engineers, Environmental Protection Agency, and Drug Enforcement Administration.

To supplement ENPRO's environmental service offerings, ENPRO partner companies operate two licensed hazardous waste receiving facilities. ENPRO Services of Maine, Inc. (EMI), located in South Portland, and ENPRO Services of Vermont, Inc., located in Williston, VT, are RCRA Part B permitted facilities for the transfer, storage and consolidation of hazardous waste. EMI is also an approved oil recycling facility and an industrial wastewater treatment facility.

Cowie attributes the growth and success of ENPRO to the following, all of which allow client-focused assessment, evaluation and resolution of environmental concerns:

- * The depth and breadth of ENPRO's highly trained and skilled employees, including equipment operators, HazMat drivers, environmental chemists, storage tank installers, scientists, engineers, and geologists. Many employees have more than 20 years of experience in the environmental field, much of it at ENPRO;
- * The wide variety of environmental services-specific equipment, from emergency response vehicles to excavators to vacuum and vactor trucks to mobile treatment systems. ENPRO's ownership of all of its equipment ensures that the equipment is available for its clients at all times;
- * Strong relationships with environmental regulators throughout New England, fostered by up to 20

years of working for and with the State environmental protection agencies.

- * Wide geographic distribution of service centers and treatment facilities throughout New England

Here are a few of ENPRO's major milestones:

- * 1983: ENPRO Services, Inc., is founded in Mass.

- * 1984: ENPRO receives its first Emergency Response contract with the Massachusetts Department of Environmental Protection.

- * 1997: ENPRO receives its first Emergency Response contract with the Maine Department of Environmental Protection.

- * 1998: ENPRO opens a Service Center in Portland.

- * 2001: ENPRO Services of Maine, Inc., is founded and purchases a waste oil recycling facility and hazardous waste storage and treatment facility in the city of South Portland.

- * 2003: ENPRO receives its first Emergency Response contract with the Connecticut Department of Environmental Protection.

- * 2004: ENPRO opens a Service Center in Pembroke, NH.

- * 2004: ENPRO receives its first Emergency Response contract with the New Hampshire Department of Environmental Services.

- * 2006: ENPRO Services of Vermont, Inc., is founded and purchases a Hazardous Waste Storage and Transfer Facility in the city of Williston, VT.

- * 2007: ENPRO opens a Service Center in Burlington, VT.

Some of the services provided by ENPRO include:

- * 24/7 emergency response for a oil and chemical releases

- * Facility decontamination for revitalization and re-use

- * Regulatory compliance and technical assistance

- * Waste identification and chemical packaging

- * Transportation and disposal of bulk and containerized (drummed) waste

- * Installation of soil and ground water remediation systems

- * Petro-chemical storage tank maintenance, upgrade, removal and replacement

- * Oil/water separator pump-outs, cleaning and maintenance

- * Equipment rentals (frac- tanks, roll-offs and other remediation equipment)

About ENPRO Services, Inc.

Headquartered in Newburyport, Mass., ENPRO Services, Inc., (ENPRO), is an environmental service company that specializes in the remediation and management of oil and hazardous materials. Since the firm's inception in 1983, ENPRO has succeeded in providing clients with cost-effective solutions to a wide spectrum of environmental concerns. Throughout New England, ENPRO executes timely response measures in compliance with federal, state and local regulatory requirements. In both the private and public sectors, the firm has developed a wealth of experience in assisting clients on large- and small-scale projects. ENPRO's comprehensive environmental services include: hazardous material transportation, 24-hour emergency response capabilities, a broad range of field services, environmental site assessments, and construction services specifically tailored to petroleum/chemical distribution and storage tank systems.
