August 04, 2009 - Connecticut

We move projects forward – that's what VHB has been doing for our clients and communities for 30 years. Providing multidisciplinary planning, design, engineering, and consulting for some of the nation's most complex infrastructure and development initiatives, VHB professionals take projects from concept to completion. Our land development, transportation, and environmental professionals create successful and workable results, changing the face of the built environment.

Three business drivers are at the heart of our success: Collaboration, Maintaining Clients for Life, and Personal Development. By focusing our time and effort on these drivers, we believe, we will continue to be successful as a firm and as individual contributors. And our generational company management philosophy holds that sustained success of our organization can only be achieved when there is equal emphasis on business and people. VHB's unique method for solving client problems focuses on integration of our service offerings coupled with our deep understanding of the full context of projects. This integration is more than just a slogan - it is how we tackle every challenge. Our team has an open-minded approach to projects and the willingness to listen and truly understand our clients' needs. This collaborative approach to strategic project planning, along with proactive management and nationally recognized professionals, help our clients and our communities solve critical problems - VHB gets it done.
